To whom it may concern,
I wish to add my voice to the justified objections to the above developments
As local people, we are already suffering increased pollution, and congestion. there is simply not the infrastructure to support the number of proposed homes and businesses, and even IF new schools and medical facilities are built, it would be years before anything happened and on the mean time, already overstretched resources will not be able to cope
The council is considering destroying beautiful green spaces to achieve this, there is so much wildlife here, the peregrine falcons from the church in Ossett come to hunt, people need places like our green areas more than ever, and I ask that you please consider the awful detriment thousands will face.

Kind regards
