Dear planning committee,

I have received a letter today regarding planning application number 2021/93689.
As a person who resides here, I am very open to the building of new houses and definitely agree with this. However, by building these houses, you are going to destroy Lees hall community centre, which is a central point to many people. Although you claim to relocate it, when I spoke to the people in charge of this community centre, they had heard no such thing and were just as surprised as I was to receive this letter. They haven't been told anything about this which is quite worrying.

The letter we received today outlined details of the plan but wrote that if we had any queries we should submit it by the 25th. Today is the 24th. With less that 16 hours to review and comment on this, I will not have expressed all my concerns but this is a very heartfelt matter to me as it is regarding my community, the place I gave lived all my life.

Furthermore due to all this construction you are planning, traffic will only increase. As it is already a busy road it will make it harder for people to go about their daily business. I hope you have considered all your options.

Kind regards,
A concerned citizen
