Consultation Response from KC, **Highways Development Management**
2022/90671 Emerald St HWRC, Fartown, Huddersfield, HD1 6BY
Variation condition 3 (opening hours) on previous permission 2007/93455 for change of use of composting pad to permit screening of inerts and shredding of wood waste in addition to green waste
Date Responded: 24/05/22 **Responding Officer: CNB** **Responding Ref: K5-8NE/34**

AMENDED INFORMATION RESPONSE
This response was provided after receiving additional information from the applicant relating to errors in the application about the previous permission that needed to have a condition varied. This has been amended not to variation of condition 2 of previous permission 1998/92724.

This application is for variation of condition 2 (opening hours) of previous permission 1998/92724 at an existing household waste recycling centre with an access on to Vine Street, a 30mph two-way single carriageway access cul-de-sac of approximately 6.4m width with streetlighting and partial footways. Vine Street acts as an access to the HWRC and council depot and is located in a predominantly industrial area.

The proposal is to vary condition 2 to increase the operational times of the site to add an additional hour on Saturday and Sunday from 16:00 to 17:00.

This additional hour of operational time is not expected to have a severe impact on the operation or efficiency of the local highway network or on road safety. However, it should be noted that the change in timings now causes the opening times to clash with the final whistle (16:45) at the nearby Huddersfield Town football ground and so an increased pedestrian and vehicular movement profile should be expected on and around Leeds Road during this time when home matches are being played.

With this we consider the application for the variation of condition 2 to be acceptable on highways grounds.
