Hi
I have been looking at the plans and have 1 very big concern over parking.
If they are going to build on the bowling green where are customers going to park?
The back lane is very narrow and is only used by services and residents getting access to their property.
If the plan is thinking of parking on the back lane (which is unadopted) I foresee lots of problems and argue if residents cannot enter or leave there property due to bad parking.
This affects my family as 2 people in the house have and one has regular and as such access can be needed at all time.
Looking forward to your reply
