Photographs of School Street, Holmfirth and site of proposed Open Air Market

Existing stalls in Holmfirth Market.

These will be used outside in future. Note the size, 3 m long, and height.

School Street from the bridge over the River Holme.

Note the path down School Street, with path the car park to the right.

Note the garage, to be used for storage to the left.

School Street looking to the garage. This will be used for storage of the stalls and ground adjacent for 2 wheely-bins.

Note the bins can be pushed back against the hedge, reducing the threat of fly-tipping.

Note the access for waste removal outside of market hours.

School Street towards the Methodist Church on the left.

Note the fence to the bottle bank and Crown Bottom Car park and the 1.2 m high stone wall to the grass belonging to the Methodist Church.

Note also the double yellow lines restricting parking, which will need some sort of amendment on market days.

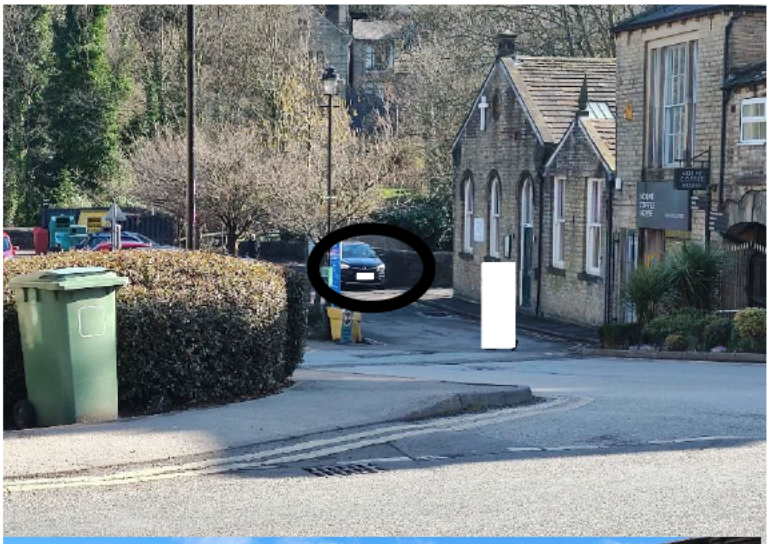
School Street and access to the Methodist Church and its parking. The market site is on the cul-de-sac to the left of the junction in the picture.

School Street looking towards the River bridge. This is the 18m by 5.7m site for the market.

Listed Buildings considerations.

View from the site boundary towards Huddersfield Road. The Civic Centre is to the right, showing the edge of the centre.

81-83 Huddersfield Road is just visible to the left.



View from the edge of the Civic towards the site, beyond the Methodist Church junction.

There is no visual impact from the market from this end of the Civic.

View from the steps of 81-83 Huddersfield Road to School Street. The market site is inviable from the houses.
