Hi Joe

I have been contacted regarding 2 dangerous sycamore trees at 105 birkby hall road that are in a conservation area.

One of the sycamore's has already blown it's top out and caused major damage to a neighbour's property and is left unbalanced, the property owner is requesting to have it removed immediately.

The second sycamore has a large cavity at the base and is very close and leaning over the neighbour's property and and has a lot of movement with the high winds we have just experianced, the property owner is requesting immediate removal

I suspect both trees have been heavily reduced in the past which has caused the cavity in the lager tree.

Please find attached images of both trees

And I would like to use this email as notification that we intend to remove both these trees within 5 days

Any queries please do not hesitate to contact me
