Your comments:	I have concerns that the provision of waste storage is inadequate. A 48 bedroom development requires waste storage for 8640ltrs of waste, (equal to 180ltrs per bedroom) this is equivalent to having x8 x 1100ltr containers on site for the storage of general domestic waste only, collected on a fortnightly basis. the same number/size of containers would also be required for the storage of recycled waste, again collected on a fortnightly basis. The plans only show provision for the storage of one of each of these containers + a compostable container, which Kirklees Council do not currently provide a collection service for.
