The proposed structure would significantly impact the sunlight that I receive via my side window into my kitchen and this is the main reason for my objection, actually it would more than significantly impact it, it would completely remove sunlight. My view also would be removed completely. Rather than looking out over an abundance of trees and the wider landscape I would be faced with a brick wall. Looking at the plans the length of the building would go as far as my back garden which would also mean when I am out there, again, I will be looking at a brick wall. I do not enter this objection lightly, but the negative impact on my living conditions are too high for me to ignore.
