Artificial lighting Statement

Where possible artificial lighting levels during construction are to be reduced by the careful selection of lighting, the use of barriers and siting/directing light sources away from existing buildings.

We are fortunate that this development is naturally shielded by the existing boundaries, so we do not envisage there being a problem with artificial light pollution.

Complaints Procedure

If a local resident wishes to make a complaint regarding any artificial lighting issues in the surrounding area with a failure to control such, the Orion Head Office number is displayed on main signage into site. In most cases, a director will be made aware of complaints to ensure it is dealt with in the correct way and recorded.
