There is not enough to protect the woodland from the damage caused by construction, and later habitation. As per the government website, it states 15m is the bare minimum and a larger buffer zone is required where the site is close to residential property. Also the current infrastructure is at breaking point. Rowley lane is becoming a motorway with speeding vehicles and increased heavy traffic and noise. Schools are at capacity and surgery and dental practices full. Kirklees does not listen to local residents and will not take any of these injections by residents into consideration. Basically the council is a joke.
