Type of comment: An objection
Planning to build a house on a garden is unacceptable, after viewing the plans I don't see the public right of way that should be there down the said garden to the houses on the row below, it seems to have been blocked off and overlooked but it is on . The access to the garden is very narrow and would cause access problems around to the front . After having , I don't see how a whole house can be passed as a viable plan
