The project and new plans should be very carefully considered here. Why would 42 Low Town be acceptable but not this? I note several objections with similar comments. Certainly lots of comments mention the tree removal. I note on the 2 separate applications to remove the trees the council not only approved both application with objection but themselves recommended the trees be removed as unsightly or damaged I personally feel this project would be a massive benefit to the local area and would improve safety of visitors. I note that an application has been made to lower the speed limit on Low Gate and Low town to 15 mph which is surely the right thing to do anyway? The current owners have owned the land since 2015-16 i believe . If the Burton Environment Group or local residents want the land, has it been explored for the collective to purchase the land at current market price? I have seen the local estate agents have been on site with the owners i can only presume to value it? Lastly the council need to take action and make the local business owners and employees park elsewhere rather than on Low Gate, Low Town and Riley Lane during the day. This is the real issue with parking in the village. Its OK the time limit been introduced to the village for parking but its pushed the problem to the other road around the village
