To whom it may concern,

Following the revised planning application 2019/90190 I continue to object based on policy LP24 which states

"Good design should be at the core of all proposals in the district and should be considered at the outset of the development process, ensuring that design forms part of pre-application consultation of a proposal"

"Proposals should promote good design by ensuring:
the form, scale, layout and details of all developments respects and enhances the character of the townscape, heritage assets and landscapes".

The designs are not sympathetic to the surrounding areas, and there is also question of the distance between the new and existing dwellings on Low Gate.

I still maintain my previous objections; the impact that this could have on the infrastructure of Low Town and Low Gate with the addition of up to six more vehicles, the risk of accidents on Low Gate due to the additional six vehicles, the loss of natural wildlife habitats, concern over the structure of George Street should excavations take place.

Yours sincerely,
