Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes

Firstly, I am shocked at the absurdity of the timeframe provided for any comments to be made on this application, as well as the inaccuracy of the information provided with regards to key dates.

When the latest modified plans for the proposed application were published on 18th October 2022, how is it possible for the public consultation start date to have been 14th October 2022, as currently stated on the site? This is clearly inaccurate.

It is disappointing that the issues pertaining to this application that were highlighted previously (by over 900 residents) still remain. I am unable to reiterate all of my concerns once again as I simply don't have the time having been given such a short timeframe to submit comments, but I would like to make it clear that the proposed application still remains a great concern.
The Council should address all previous concerns highlighted by the residents of the neighbourhood and check whether any of the modifications made to the latest proposed plans alleviates each of these concerns.

The issue of increased congestion and traffic is still deeply concerning.

Moreover, the Masjid Abu Bakr/Lees Hall Community centre building is a significant and valuable community asset. It accommodates for the religious and educational needs of the local residents, and also has an outstanding nursery running on its premises. The fact that the proposed application which sought to relocate this building have not provided any room for relocation of these important facilities within the new development is absurd.
The facilities should remain at the site as they are and the Council should develop plans that do not affect the community rather than seeking to relocate such an important community asset.
