Dear Planning Committee,

I write to you in relation to planning application number 2021/93689.

Firstly, I am aware the previous application relating to the building of homes had a lot of public interest, with many objections. Despite this, it is disappointing how planning was only submitted a few days prior, with very little time given to comment on the matter. I only received a letter informing of this application today, with only 15 hours left to submit any comments.

Secondly, I have heard that the Masjid Abu Bakr committee and Lees Hall Playgroup have confirmed that the Council has not had any discussions with them or reached a viable arrangement despite the mosque and playgroups and their representatives following-up on this consistently.

Ravensthorpe Road and Lees Hall Road both remain extremely busy, causing constant traffic and disruption. I am concerned that the the proposed plans will only increase the traffic and noise. I am afraid this will only further increase the chaos and disruption we face on a daily basis. Furthermore, I have just been informed of a cyclops junction being made at the site of the small roundabout
This only raise our worries about the traffic increasing.

Not having been given even one day to comment on this, I have not been able to express the many issues and concerns relating to this issue. Therefore, I hope for further discussion and more time in order to reach a just decision.

Kind regards,
A concerned citizen
