This building will directly effect the safety of pedestrians mainly school children walking to and from their schools. This area of Honley is very congested already and has very limited parking. Cars already park dangerously in that area with the extra customers cars added it's an accident waiting to happen! There isn't a footpath outside the front of the purposed building so children have to walk through the small carpark to get to school which is not safe! Also the building is not in keeping with the heritage of Honley and would look an eyesore in our beautiful village!
