Erection of external substation and boundary treatment

Date Responded: 16/05/22
Responding Officer: J Turner
Responding Ref: K12-40/15

This application seeks approval for the erection of an external substation and boundary treatment at Abbey Road, Shepley.

The proposal would see the installation of substation that opens out onto the unadopted track known as Stretch Gate. Access to the public highway is shown by the red line boundary including the estate road and short path within the development.

The access arrangement is acceptable, and whilst Stretch Gate is not an adopted highway, it is classed as a public bridleway and is suitable for vehicular access at this point so therefore provides a satisfactory (or even preferable) alternative route to the substation.

Highways DM has no wish to raise objection to the scheme.

No specific conditions are deemed necessary.
