My concern is the increased volume of heavy vehicles and large vans travelling daily, up and down Grimescar Meadows to service this pharmacy. This development was build to accommodate residential properties, and number 26 is situated in a small cul-de-sac with a single access road. There are no pavements so the kerbs and service margins are being damaged as vehicles mount the kerb to pass. The safety of the children living there is also being compromised by the increased vehicular activity and parked cars. The whole estate is accessed and exited by Reap Hurst Road. There is a public bridleway which crosses this road, in a dip. This is a popular path used constantly by dog walkers, ramblers and children. Cars belonging to the pharmacy workers are being parked all day near this dip, obscuring the site line, so walkers are having to step further into the road before crossing, and all vehicles entering and exiting the estate are being forced onto one side of the road, particularly dangerous in winter. The character of the area has changed due to this commercial activity and the security of the area threatened by the knowledge that drugs are being stored in one of the houses.
