I am formally objecting to the application 2025/93355.
I do not believe that Hepworth Kane is suitable for the pontential increase in traffic caused by this new development. Hepworth Lane is bottle necked both top and bottom and is only wide enough for single lane traffic at these points. At the start and end of school days the road is often at a standstill and we already avoid leaving our homes at these times. This can only get worse with thus development. There are also no pavements in these areas making it dangerous for pedestrians.
Parked vehicles and parked carks also cause congestion on the full length of the lane.
This development couuld bring an additional 150 vehicles to the immediate area. This will also impact the enviroment.
I also have concerns that in the event of emergencies, energency vehicles could struggle to get through. Further more, surrounding roads such as Wellhouse lane are also narrow and difficult to pass during bisy times such as school start/finish time, match days at the Parish Cricket Club and when football matchs are being played on the rec. This means that disruption would be for the full week and not just school days.
I am also concerned about the loss of green space and damage to the natural environment. The public foots paths are often ysed by dog walkers and ramblers and people just getting out in ghe fresh air.
