Prior notification for proposed 5G telecoms installation: H3G 15m street pole and additional equipment cabinets
Date Responded: 10/05/2023. **Responding Officer: D. Stainsby** **Responding Ref: K2-12NW/27**

This application is for a proposed 5G telecoms installation: H3G 15m street pole and additional equipment cabinets on Longwood Edge Road, Salendine Nook, Huddersfield.

RECOMMENDATION

No objection subject to a construction management plan and maintenance plan being agreed.

The site is at the back of footway and is set back far enough as to not obstruct the footway.

As a result, the site is acceptable on Highway Safety grounds and Highways DM would not object to the proposals.

However, a condition requesting a construction management plan for the installation of the equipment and a maintenance plan for the ongoing maintenance of the equipment will be required.

The siting of a crane within the highway adjacent to this junction of Longwood Edge Road and Centuria Walk will cause an obstruction and probably require traffic management.
