Yet again different plans for another house to be built. Same problems arise as last time. Parking issues. How big is the driveway. How big is the garage. What will the impact be on local residents and environment. How will access be gained as there is no access to the area. How long if approved would it all take. Somerset Road is a very important part of the main route to and from Almondbury. The prospect of traffic lights on such a busy route will have a huge impact. There is also the issue of site traffic etc. I am totally against this building going ahead.
