| There is insufficient very little detail on this application, where is the parking, turning, garden. What are the materials?<br>no bat survey has been submitted.<br>Access is only 4M wide and is serving more than four homes without passing places and visibility onto the road looks very tight, I am concerned this will affect the highway safety near my home.<br>I was also advised by a planning consultant that this building is too large to be converted into a home under a Class Q. | |
