To whom it may concern,

I am writing to formally object to the proposed erection of a signage board at the Westgate, Cleckheaton site.

My objection is based on the ongoing investigation by the council regarding the safety of the site due to contaminants, and the support of council members for this investigation.

The proposed signage details are as follows:
- The free-standing sign will total 2.4m in height, displaying two separate signs, each 1.2m in height. The supportive poles will be visible and separate the two signs.
- The sign will be 2.4m in width.
- The sign will have a black background and will display the Thirteen Group logo with informative imagery.
- The maximum height of text will be 60cm.
- The sign will not be illuminated.

While Paragraph 141 of the NPPF states that "Advertisements should be subject to control only in the interests of amenity and public safety, taking account of cumulative impacts," the current safety concerns related to contaminants at the site should take precedence.

Thank you for considering my objection.
