Indicative LEAP & Kickabout Proposals

The LEAP proposals will incorporate a feature climbing frame alongside a range of play elements, providing opportunities for children of different ages and abilities to engage in active, imaginative and social play. Painted metal and timber equipment will create a visually engaging space sympathetic to the surrounding landscape. Seating will provide areas for parents, carers and children to rest, while ornamental shrub planting will soften the setting and enhance the sensory experience. Due to its distance from the road, the LEAP will not require a formal boundary, providing ease of access between the play area and adjacent kickabout space.
