Subject: Objection to Planning Application 2026/70/92558/E

Dear Planning Department,

One may presume that the application is to get Kirklees to approve the as-built position of the southern stone wall boundary rather than the boundary approved on Application 2021/62/93006/E. However, the two Plans and the Application Form submitted provide NO details of what is to be considered and do not provide any context or arguments to support the Application. The Application Form refers to a "Covering Letter" but this is not included as a part of the submission.

I recommend that this Covering Letter should be added to the Application and when done so the Statutory Consultation and Public Consultation End Dates should be revised to give the consultees and the public a further 21 days in which to comment from the date the Application is amended.

I am sure that the Planning Department would agree that due process has not been followed when the submission has presently insufficient information upon which anyone can make a comment or judgement.

This is particularly relevant as Application 2026/92024 tried to have this incorrect boundary position accepted but this was refused by Kirklees Planning.

Kind Regards
