#### Executive summary

All local authorities have a statutory duty to ensure there are sufficient early learning places for eligible 2, 3 and 4-year olds and sufficient childcare places for working parents. This document is a study into the supply and demand of childcare within Kirklees.

Assessing childcare places is a complex process which depends on a large number of variables including but not limited to; the effects of changes in child population demographics, employment rates, housing developments, the movement of families within local authority ward areas, local geography and parental choice.

Throughout the COVID-19 pandemic, childminders, nurseries, pre-schools and out of school clubs continued to provide a crucial service for working parents and provide vital support for vulnerable children.

However, 2021 has been very difficult for the sector already struggling due to a continuing decline in the population of children aged 0-4, increased cost pressures and low early years funding rates (Kirklees receive the lowest early years funding rates along with a third of other local authorities in England). Some childcare providers, in particular sessional providers, have been experiencing sustainability pressures during the last few years. Between April 2020 and December 2021, 11 group-based providers, 6 out of school clubs and 51 childminders closed. One school based provider is expected to close in 2022.

The long-term effects of the pandemic on the childcare market are yet to be fully understood. Changes to working patterns, an increase in home working and the rising unemployment rate could all affect the demand for paid childcare. The Kirklees average occupancy rate in under 5 childcare settings has increased by 4% overall in autumn 2021 compared to autumn 2020 however the size of the childcare market is smaller than a year ago by 380 places, hence increased occupancy does not mean demand is increasing. There are larger variations of occupancy rates at ward level however these figures are affected more by changes in the childcare market, parental preference for a particular provider type and data return rates from providers.

A graduated approach is taken to manage the childcare market, the local authority intervenes only when required to ensure there are sufficient places in a local area. The Childcare Sufficiency Team provides a universal offer of advice and support to childcare providers with sustainability risks; this has become more important in recent months.

At 31<sup>st</sup> August 2021 there were 757 registered childcare providers in Kirklees; together they provide 23,383 childcare places, the total number of childcare places at 31<sup>st</sup> August last

year was 23,812, a reduction of 429 places. 442 providers are registered to deliver early learning places for eligible 2, 3 and 4-year-old children.

Based on the data gathered from childcare providers, evidence suggests there is sufficient childcare and early learning provision with some spare capacity across Kirklees. The children per place data at ward level (Appendix 4) indicates that some ward areas have less places available than the Kirklees average. Some parents of children with SEND can experience difficulty in finding suitable childcare for school aged children.

A number of providers in Kirklees have raised concerns that they are struggling to retain and recruit qualified staff with some reporting having to limit the number of children in their care [which may lead to sufficiency issues]. A recent survey by the Early Years Alliance found that 84% of childcare providers in England had difficulty recruiting staff.<sup>1</sup>

Outcomes for children remain good with support from the Early Years Outcomes Team enabling the quality of childcare in Kirklees to continue to be high. At 31<sup>st</sup> August 2021, 97% of early learning and childcare providers were rated good or above by Ofsted for all provider types, this is the same as the average for England. The team work closely with newly registered childcare settings to ensure excellent high-quality provision is established from the start.

Increasing take-up of free early learning by eligible 2-year olds continues to be a key priority. After disruption caused by COVID-19, take-up rates in Kirklees have started to increase. In Autumn 2021 the Kirklees average take-up rate was 78% which is almost equal to pre-pandemic levels.

The average take-up level is masked by significant variations at a local level. Kirklees Council continues to develop strategies and work with partners to offer support and encouragement to parents with eligible 2-year olds to take up their free place.

#### Priorities for 2022

- 1. Continue to support parents of two-year olds to take-up their free early learning entitlement, including establishing a Parent Champion Scheme.
- 2. Work in partnership with relevant teams to improve childcare options for school age children with Special Educational Needs and/or Disabilities.
- 3. Review and enhance the Family Information Directory.
- 4. Support and facilitate training for childcare providers to review their business model and remain viable.

<sup>&</sup>lt;sup>1</sup> Breaking Point: The impact of recruitment and retention challenges on the early years sector in England | early years alliance (eyalliance.org.uk)

- 5. Roll out use of Provider Portal for non-funded providers to support the collection of sufficiency and occupancy data.
- 6. Review and update the Early Years Funding Guides for all sectors.
- 7. Update the Early Years Funding Deprivation Indices to ensure accurate distribution of deprivation funding.

#### Introduction and purpose of this report

Kirklees Childcare Sufficiency Assessments have been published on an annual basis since they became a statutory duty of the Childcare Act 2006. The Childcare Sufficiency Assessment (CSA) is a study into the supply and demand of childcare within Kirklees and is a vital tool to share information with the public, elected members and the childcare market itself. The local authority also has specific statutory duties in relation to childcare sufficiency:

- To ensure there are sufficient early learning places for eligible 2, 3-and 4-year olds
- To ensure there are sufficient extended free entitlement places for eligible 3-and 4year olds and sufficient childcare places for working parents and parents studying or training for employment
- To provide information, advice and guidance to parents/carers seeking childcare

The CSA and ward profiles provide the evidence base to justify interventions required to help the council meet its statutory duty to ensure there is sufficient childcare available in Kirklees. The ward profiles have been updated to reflect 2021 data, ward level information is also provided in the appendices.

The provision of early learning and childcare supports the Council's shared outcomes listed below:

#### Best start

• Children have the best start in life

#### Aspire and achieve

• People in Kirklees have aspiration to achieve their ambitions through education, training, employment and lifelong learning

#### Sustainable economy

• Kirklees has sustainable economic growth and provides good employment for and with communities and businesses

Full details of the Council's vision for Kirklees can be found in the Council Plan 2021/23 <a href="https://www.kirklees.gov.uk/beta/delivering-services/council-plan.aspx">https://www.kirklees.gov.uk/beta/delivering-services/council-plan.aspx</a>

#### Data sources

Most of the data contained in this report has been collected and produced by the Childcare Sufficiency Team. Data provided by a different department or organisation is labelled accordingly.

#### COVID-19 (Coronavirus) pandemic

The Childcare Sufficiency and Early Years Outcomes Teams have continued to provide a range of support to early years and childcare settings throughout the pandemic in 2021, including;

- Important key messages posted daily on a dedicated Kirklees Early Years Providers Facebook page and regular email updates
- Regular webinars and wellbeing check-in calls
- Continuing to provide support and training to providers to develop sustainable business models
- Continued to maximise the level of early years funding distributed to providers
- Supported with the prompt authorisation of discretionary grant applications
- Encouraged providers to take part in the Holiday Activities and Food Programme (HAF)

#### An overview of the Kirklees childcare market

Composition of Kirklees childcare market 31<sup>st</sup> August 2021

	Number of providers	Number of Ofsted registered places	Number of providers registered for the free entitlements
Group based – full day (PVI and maintained)	170	7,703	170
Group based – part day (PVI and maintained)	6	146	6
Home based (childminders)	235	1,635	177
School nurseries (maintained and academy)	74	4,333	74
Independent school nursery	7	274	7
Out of school (PVI sector)	89	3,092	8
After school tuition (PVI sector)	18	80	0
*Out of school (maintained sector)	86	3,696	0
Holiday schemes (PVI sector)	72	2,424	0
Total	757	23,383	442

\*Primary schools only. From 2021 where a school has a before and after school provision these are now counted as one place, previously they were counted as two places.

#### Joiners and leavers (PVI Sector)

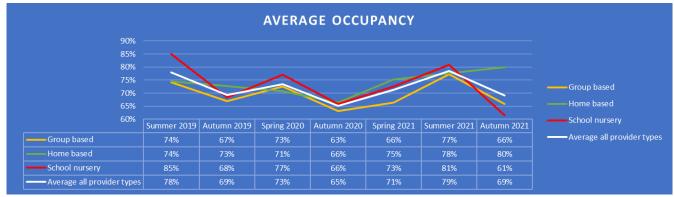

Between April 2020 and December 2021, there have been the following joiners and leavers to the childcare market in Kirklees.

Provider type	Joiners	Leavers	+/-
Home based (childminders)	17	51	-34
Group based – full day	5	8	-3
Group based – part day	0	3	-3
Out of school	3	6	-3
	25	68	-43

#### Early years occupancy – under 5's

Occupancy is calculated by using the average number of filled places across the week divided by the maximum number of places offered by providers, referred to as the operating capacity. Using termly sufficiency data updates from providers, the table below shows occupancy levels collected for the last 7 terms.

The decrease in demand for childcare in the autumn term as children start full-time school is reflected in the reduction in the average occupancy level.

Note: Due to the pandemic data was not collected in Summer 2020.

Childcare occupancy rates for the early years age group (under 5s) are affected by seasonal variations of the free early learning entitlement meaning that child numbers are lower in the autumn term when children move into school reception year and peak in the summer term.

The graph shows that occupancy has increased by 4% in autumn 2021 compared to autumn 2020, however the size of the childcare market is smaller than a year ago by 380 places, hence increased occupancy does not mean demand is increasing. This is evident for home-based providers, occupancy was 80% in autumn 2021, a 14% increase compared with autumn 2020 however the number of home-based places has reduced by 119.

Ward level data can be found in appendix 3. The table shows larger variations at ward level however figures are affected by changes in the childcare market, parental preference for a particular type of provider and the percentage of sufficiency data returns received from providers.

#### Cost of childcare

The table below represents the average rate for childminders, day nurseries, pre-schools and out of school care in Kirklees. There may be variations to prices based on the number of hours a family uses, with reductions for longer hours, or discounts for sibling groups. There may also be additional payments for lunch and other meals which are not included in these prices.

#### Childcare prices

Provider type	Price
Home based (childminders)	£4.14 average price per hour
Day nurseries	£46.68 average price per day
Pre-schools	£13.41 average price per 3-hour session
Out of school care	£15.17 average price for a before and after school session

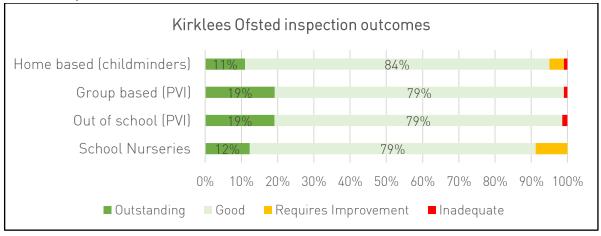

#### The quality of childcare in Kirklees

All childcare providers must register with and be inspected by Ofsted. Ofsted is the Office for Standards in Education, Children's Services and Skills who regulate services that care for children and young people and services providing education and skills for learners of all ages. Ofsted give providers an overall grade for the quality of their provision. Schools with nursery provision have an overall inspection grade for the whole school and most also have a separate early years' grade. Schools and providers have four possible outcomes: 'Outstanding', 'Good', 'Requires Improvement' and 'Inadequate'. Providers awaiting their first full inspection are excluded from the inspection outcome calculation shown below.

Research is clear, to maximise the outcomes for children it is important that the places available are good quality. Chart shows the Ofsted quality judgements by provider type for Kirklees.

The chart below shows Ofsted inspection outcomes at 31<sup>st</sup> August 2021.

## 97% of all Ofsted registered providers in Kirklees are rated Outstanding or Good, the national level is also 97%

#### Ofsted inspection outcomes

#### Quality Improvement Team

Kirklees Council has a dedicated team of Early Years officers who have extensive knowledge and experience in improving the quality of practice in Early Years settings and work in partnership to raise outcomes for children. The team offer training, advice, support and guidance to early years providers within the Private, Voluntary and Independent (PVI) sector and schools. The team currently visit all providers on a bi-annual basis but offer increased targeted support to those with a less than good Ofsted outcome where there is a local authority statutory duty to support quality improvement.

#### Free early learning and childcare for two, three and four-year-old children

The free early learning and childcare entitlement is a national scheme which provides free early learning and childcare for all three and four-year-old children and some two-year olds. Children can have up to 15 hours each week for 38 weeks of the year, 570 hours in total. Some providers offer free places during the school holidays where the entitlement is spread across the year by taking less hours each week, supporting working parents during the school holidays and providing consistency for the child.

The number of children accessing early learning is subject to seasonal variations, for 2 year olds, the number of children and take-up rates are highest in the autumn and at their lowest in the summer. In theory, numbers should be relatively the same throughout the year however anecdotal information suggests that some parents delay using their 2 year old place in the winter months (spring term) and some wait until their preferred provider has space in the autumn term. For 3 and 4 year olds combined it is the opposite pattern, numbers are at their lowest in the autumn term due to children moving to school reception year and peak in the summer term as the cohort increases, although the take-up rate throughout the year remains fairly constant.

	Autumn 2020	Spring 2021	Summer 2021	Autumn 2021
2-year olds	1,320	1,237	1,343	1,441
3-year olds (universal entitlement)	4,955	4,738	4,787	4,845
4-year olds (universal entitlement)	0	1,894	3,027	0
3- and 4-year olds (extended entitlement)	2,125	2,825	3,307	2,172
Total number of 15-hour places	8,400	10,694	12,464	8,458

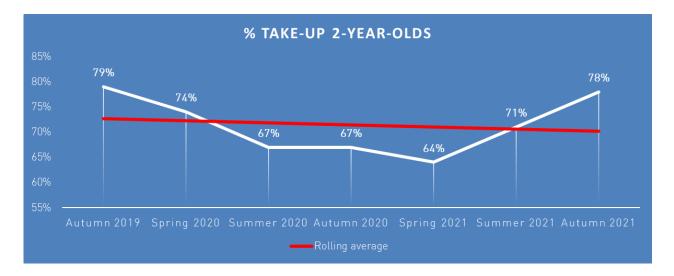

#### Number of children accessing their free entitlement

• Most 4-year olds move to school reception year in the autumn term, approximately 2% defer their place and remain in their early years provision therefore no figures are shown in this table for the autumn terms.

• 2 year old data includes out of area children

Notes:

#### 2-year-old take up trends

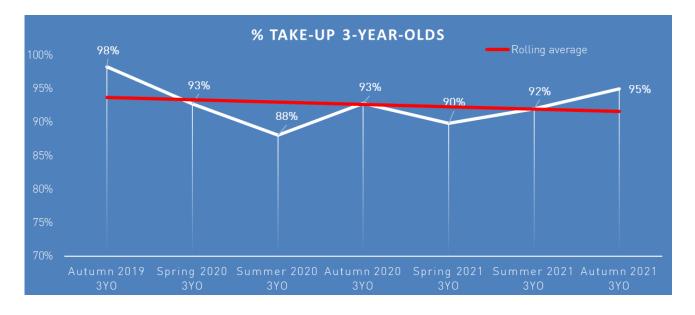

Note: Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending.

The graph shows seasonal variations referred to above. The government measure take-up in the spring term which is considered the mid-point in the year in relation to take-up. In spring 2021 the published take-up rate for Kirklees was  $60\%^2$  which was 2% below the national average. After the disruption caused by COVID-19 take-up rates have started to increase, the take-up rate for autumn 2021 was 78% which is almost equal to prepandemic levels. The total number of children eligible was 1,851 and the total placed was 1,444. Average take-up levels are masked by significant variations at a local level, this is shown in the appendix.

Increasing take-up of free early learning by eligible 2-year-olds continues to be a key priority. Kirklees Council continues to develop strategies and work with partners to offer support and encouragement to parents with eligible 2-year-olds to take up their free place.

 $<sup>^{\</sup>rm 2}$  National take-up rates differ slightly to local rates due to the different method of calculation.

#### 3-year-old take up trends

Note: Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending.

The graph shows the Kirklees average take-up rates for three-year-olds over the last seven terms. Average take-up is usually consistent, however, the pandemic has had an impact.

It is important to note that since the pandemic, data of Kirklees children attending settings outside Kirklees has not been received from some local authorities which can account for up to 2%, therefore take-up in autumn 2021 could be 97% which is almost at the level prior to the pandemic.

#### 30 hours free childcare for 3- and 4-year-olds

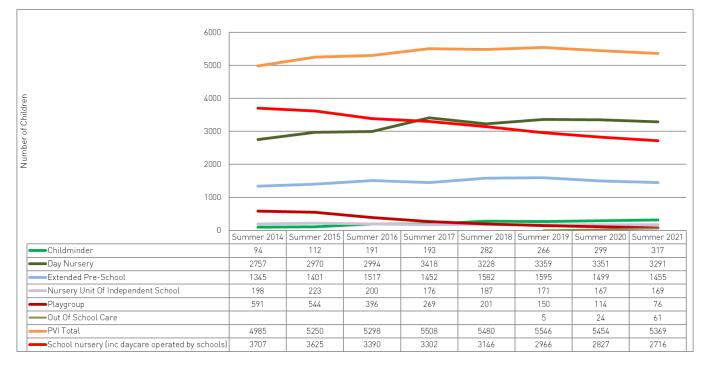

In September 2017, the entitlement was extended to some working parents of 3 and 4 year olds so they could receive an extra 15 hours per week of free childcare, (this is known as the extended entitlement) details of the eligibility criteria can be found <a href="https://www.gov.uk/apply-30-hours-free-tax-free-childcare">https://www.gov.uk/apply-30-hours-free-tax-free-childcare</a>. Eligible children can therefore access up to 1,140 free hours until they start a reception class in a school.

#### Number of children taking up the extended entitlement

Note: Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending.

It is interesting that the extended entitlement trend is continuing to increase slightly given the effects of the pandemic on the 2 year old entitlement and universal entitlement for 3 and 4 year olds.

#### 3-and 4-year old take-up by provider type

Note: Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending.

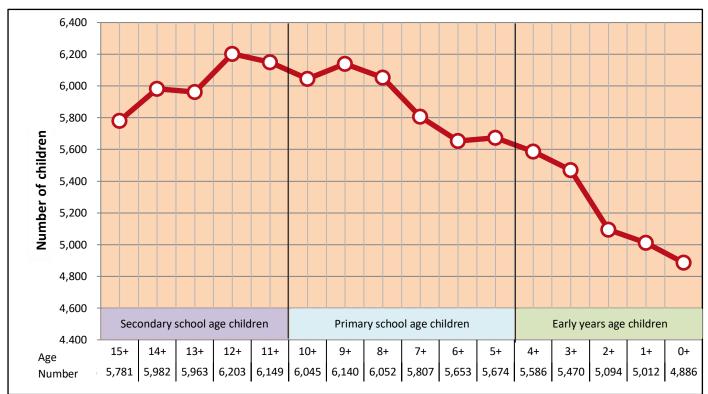

Over several years demand has shifted to more flexible provision (day nurseries, extended pre-schools and childminders) over less flexible sessional provision (some playgroups and some schools with nursery provision). However, this may change, due to the pandemic

people's working patterns and locations have changed hence this could affect preferences for different types of provision in the future.

The above chart also shows that more children now access a place in the private, voluntary and independent (PVI) sector than nursery provision in maintained schools and academies. The percentage has increased from 57% in PVI settings in 2014 to 66% in 2021.

#### Kirklees childcare market – future demand

The population data shown in the chart below is derived from an annual snapshot of GP registrations. Historically this is the best measure of the population because it gives an update on births, migration in and out of the area, and changes in residents due to tenancy changes or house building.

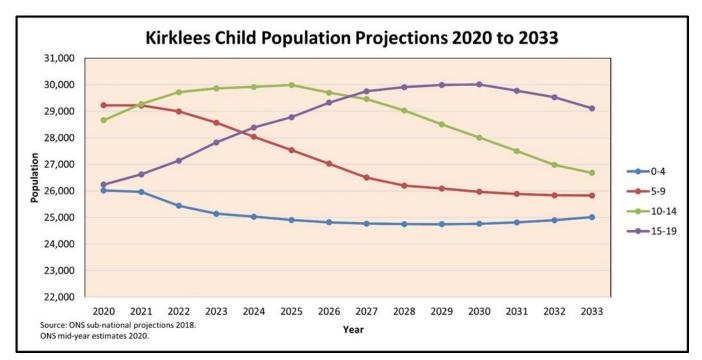

The information clearly shows a decline in the population of children aged under 8.

Source: NHS GP registration data January 2021 (age at 31 August 2020) – Kirklees Public Health

Population numbers in each ward can be found in appendix 5. These are based on a more recent dataset - October 2021 GP registration data (age at 31 August 2021), which has also been used in the ward profiles and to calculate the children per place indicator shown in appendix 4. In this dataset the registrations for children aged 0 are thought to be understated as by January 2022 there were 280 more children registered.

The following table shows the Office of National Statistics (ONS) forecasts for fluctuations in child population at a Kirklees level:

**Caution** should be exercised in using GP registration data as a proxy population for the following reasons:

- GP registration data does not always match ONS forecasts although there has been greater synergy in recent years with both indicators showing similar trends
- It is a snapshot data set from a fixed point in time and subject to change
- The data by its very nature will always be incomplete and out of date before publication
- At a ward level there are greater accuracy risks associated with smaller sample sizes

The context of variation in the different population estimates in Kirklees can be illustrated by looking at census night (27 March 2011). On this night it was estimated that the normal resident population of Kirklees was 422,500. This figure was 12,000 more than the ONS modelling and 12,000 fewer than GP registrations representing a difference of +/-2.8%. The further into the future attempts are made to predict population numbers, the less accurate these projections are likely to be.

Further information about Kirklees populations can be found at the following links:

Kirklees Joint Strategic Assessment – Population, migration, births and deaths <u>http://observatory.kirklees.gov.uk/jsna/population</u> Links to more demographic information about Kirklees <u>http://www.kirklees.gov.uk/beta/information-and-data/area-and-ward-profiles.aspx</u> Kirklees Census information: <u>http://www.kirklees.gov.uk/beta/information-and-data/census-information.aspx</u> Migration Yorkshire – population and migration information <u>http://www.migrationyorkshire.org.uk</u>

#### Unemployment - % claimant count rates 2015 – 2021 (June 2021)

Year	2015	2016	2017	2018	2019	2020	2021
Kirklees	2.29	2.01	2.18	2.95	3.48	6.76	6.00

Source: Office for National Statistics (NOMIS)

The unemployment total for Kirklees in June 2021 was 16,075 or 5.9% of 16-64 year-old population (England 5.6%). This represents a decrease of -2,055 claimants on the same time last year, the last time that unemployment was numerically this high was in July 1992 (14,505), though in January 1986 it reached 20,855. The lowest number of claimants in recent years was in December 2016 (5,380). The ward with the highest unemployment rate is Dewsbury West (9.8%), with Kirkburton being the lowest at 1.9%.

In June youth unemployment (16-24) stood at 3,130 or 6.6% of the population aged 16-24 (England 6.1%), -700 lower than the same time last year.

Ward level information can be found in appendix 6.

#### Housing and business developments – The Local Plan

Kirklees Council's Local Plan is a housing and industry development strategy for the borough and identifies sites across Kirklees that could provide homes or business premises. The Kirklees Local Plan was adopted on 27 February 2019. The Local Plan is now the statutory development plan for Kirklees and has superseded the Kirklees Unitary Development Plan. Planning applications must be determined in accordance with the development plan unless material considerations indicate otherwise.

Maps are available to view at the following link to find further detailed information about where and when new housing developments may be built in a local area:

www.kirklees.gov.uk/localplan

It is worth noting the following site allocations propose a substantial level of residential growth which are likely to significantly increase the demand for childcare places and therefore potential opportunities for childcare providers.

- Dewsbury Riverside total of 2310 dwellings, 1690 within the plan period (Dewsbury South).
- Chidswell total of 1535 dwellings, all within the plan period (Batley East/Dewsbury East).
- Bradley total of 1958 dwellings, 1577 within the plan period (Huddersfield North).

To assess the impact of new housing developments on future school places, it is an established practice to use a formula of 100 new homes resulting in the additional demand of 3 places per primary school year group and 2 places per secondary year group. As a guide, locally, 1.5 early years and childcare places per age group (0 to 5 years) and 3.5 after school places per age group (5-11 years) are used to indicate the impact on demand for childcare places.

Full details and copies of all the available Local Plan documents are available here: <a href="http://www.kirklees.gov.uk/localplan">www.kirklees.gov.uk/localplan</a>

#### Business sustainability and future sustainability

The COVID-19 pandemic has placed a financial strain on childcare providers, particularly those dependent on fee paying children.

Over and above normal inflationary pressures are additional costs as a direct result of changing legislation:

- Increases in the national minimum wage and national living wage rates <u>https://www.gov.uk/national-minimum-wage-rates</u>
- Employer pension contributions <u>https://www.workplacepensions.gov.uk/employer/</u>

To remain sustainable, it is important that all childcare providers consider the everchanging market. Providers may consider the following to mitigate risks of sustainability pressures:

- 1. When the time is right, carry-out market research to understand parents needs which may have changed due to COVID-19 and review business models accordingly.
- 2. Promote the free entitlements and support parents to apply for a place if they think their two-year-old is eligible. Banners to promote the free entitlement offers (2-year-old and 30-hours) are available from Kirklees Council for providers to display in prominent positions
- 3. Register for Tax Free Childcare and raise awareness with parents by signposting parents to the Childcare Choices website <u>https://www.childcarechoices.gov.uk/</u>. The website also contains marketing materials which providers can use to promote the various schemes <u>https://www.childcarechoices.gov.uk/communications-toolkit/</u>
- Maximise funding by encouraging parents to supply their details to apply for Early Years Pupil Premium (EYPP) and, where appropriate, Disability Access Funding (DAF)
- 5. Use the Kirklees Business Support Tools (Breakeven calculator, Occupancy calculator and cash flow statements) <u>Grants, other funding and business advice for childcare providers | Kirklees Council</u>
- 6. Seek professional advice at the earliest opportunity if there are any concerns about sustainability.

#### Other resources to help early years providers run a sustainable childcare business:

- <u>https://www.gov.uk/government/collections/early-years-business-</u> <u>sustainability</u>
- o <u>https://ndna.org.uk/nursery-business-support-early-years-business-zone/</u>
- o <u>https://www.eyalliance.org.uk/business-and-management</u>

The Kirklees Childcare Sufficiency Team can support providers with sustainability concerns or signpost to someone who can, email: <u>childcare.sufficiency@kirklees.gov.uk</u>

#### Kirklees Early Years Funding Formula 2021-22

In November 2020 the Department for Education (DfE) announced an extra £44m for early years in 2021-22 for local authorities to increase hourly funding rates paid to childcare providers. Following consultation and engagement with the sector it was approved to use the additional funding to increase both hourly base rates.

The base rates for the financial year 2021-22 are shown in the table below alongside temporary base rates. Using funds from 2020-21 both base rates were increased on a temporary basis by 16 pence in summer and autumn 2021 and 23 pence in spring 2022.

	Permanent rates	Temporary rates						
		Summer 2021	Autumn 2021	Spring 2022				
Two-year olds	£5.17	£5.33	£5.33	£5.40				
Three-and four-year olds	£4.27	£4.43	£4.43	£4.50				

Eligible three and four-year-old children are entitled to additional funding:

- a) Deprivation supplement; measured using the Income Deprivation affecting Children Index (IDACI). The hourly rates are:
  - Band 1: £0.05
  - Band 2: £0.11
  - Band 3: £0.14
  - Band 4, 5 and 6: £0.21
- b) Early Years Pupil Premium; applicable to universal entitlement hours only, the hourly rate is £0.53.
- c) Disability Access Funding (DAF); a lump sum payment of £615 is available each year to funded children in receipt of Disability Living Allowance (DLA).

#### 2022-23

On 27 October 2021, the Chancellor announced additional funding for the early years entitlements worth £160m in 2022-23, £180m in 2023-24 and £170m in 2024-25, *compared to the current financial year*. This is not additional funding each year on top of the previous years funding, nationally compared with 2022-23 there will be £20m extra in 2023-24 and £10m extra in 2024-25 which reflects changes in the population of two, three-and four-year olds over these years.

Following consultation and engagement with the sector it was approved to use the additional funding to maximise an increase to both hourly base rates on a permanent basis. The base rates are £5.38 for two-year olds and £4.48 for three- and four-year olds. It is estimated that a temporary uplift to the rates can continue until March 2023, subject to sufficient funds.

#### Families in challenging circumstances

#### Looked After Children

The vast majority of looked after children in Kirklees aged 2 to 4 access free early education and care. Where they are not accessing their entitlement, the reason is known, and the validity checked by a lead social worker. Furthermore, protocols are in place to only place Looked After Children in provision judged by Ofsted to be 'good' or 'outstanding'.

The Kirklees Virtual School plays a significant role in ensuring the educational needs of each child are met. An initial PEP (Personal Education Plan) is completed with the early years setting, social worker and carers at age 3 to ensure each child's development in the early years is supported and tracked. This is reviewed on a termly basis.

#### Children with special educational needs and disabilities (SEND)

The council's ambition for children and young people with special educational needs and disabilities (SEND) is the same for all children and young people – that they achieve well in their early years, at school and in college and lead happy and fulfilled lives.

Children with SEND and their families are entitled to good quality, affordable childcare the same as any other family. The Children and Families Act 2014 stipulates that childcare must be available for young people with special needs or disabilities up to the age of 18. Childcare providers should not treat a child any less favourably because of their disability and they should not charge more for a disabled child.

There are a number of schemes available to support parents to pay for childcare;

- Two-year-old children in receipt of Disability Living Allowance are eligible for 15 hours of free early education.
- The Disability Access Fund (DAF) is a lump sum payment of £615 per child each year to providers who have eligible funded 3 and 4-year-old children in receipt of Disability Living Allowance (DLA). For further information see <a href="https://www.kirklees.gov.uk/beta/working-with-children/pdf/childcare-providers/disability-access-fund-application-form.pdf">https://www.kirklees.gov.uk/beta/working-with-children/pdf/childcare-providers/disability-access-fund-application-form.pdf</a>
- Tax-free childcare supports working families by reducing childcare costs. For every £8 a parent pays into an online account, the government tops up an additional £2. Tax-free childcare provides up to £2,000 per year for each child under 12, or £4,000 per year for disabled children under 17. Further information is available at www.childcarechoices.gov.uk

• The SENIF (SEN Inclusion Funding), previously known as the Access Fund, is available to support the inclusion of children with special educational needs (SEN) attending early years settings.

<u>The Kirklees Local Offer</u> brings together information for children and young people with special educational needs and disabilities (SEND) and their families. Kirklees childcare providers are encouraged to let us know any experience they have with caring for children with additional needs to enable parents to make informed choices about suitable childcare.

Kirklees Council will continue to work with parents and providers to ensure good quality, accessible childcare is available to all.

#### Families in or at risk of poverty

Early learning and childcare supports the return to work to tackle poverty by providing:

- Access to childcare, thereby removing a barrier to work for parents and facilitating work as a route out of poverty
- Access to highest quality early learning experiences thereby helping to improve life chances and facilitate social mobility as a step towards reducing future poverty.

Increasing the take-up of early learning for eligible two-year olds and a continuation of a challenge and support strategy to improve the quality of early learning and childcare provision remain priorities to help tackle poverty.

Early Years Pupil Premium (EYPP) provides extra funding for three-and four-year-old children who are in care or have left care through adoption, special guardianship or a child arrangement order, or whose parents are in receipt of certain benefits. Childcare providers should use the additional funding to support children's learning and development.

#### Childcare brokerage service

Most families can find suitable childcare by using the online self-service website, contacting local providers or the Family Information Service. For a minority of families with more complex needs or those which require just a little more help, a personalised brokerage service is available. Brokerage services are tracked and analysed to identify potential childcare sufficiency pressures.

During 2021, the Childcare Sufficiency and Early Outcomes Teams dealt with 27 childcare brokerage cases. Eleven of the cases related to children with very complex additional needs.

#### Priorities for 2022

- 1. Continue to support parents of two-year olds to take-up their free early learning entitlement, including establishing a Parent Champion Scheme.
- 2. Work in partnership with relevant teams to improve childcare options for school age children with Special Education Needs and/or Disability.
- 3. Review and enhance the Family Information Directory.
- 4. Support and facilitate training for childcare providers to review their business model and remain viable.
- 5. Roll out use of Provider Portal for non-funded providers to support the collection of sufficiency and occupancy data.
- 6. Review and update the Early Years Funding Guides for all sectors.
- 7. Update the Early Years Funding Deprivation Indices to ensure accurate distribution of deprivation funding.

#### Appendix 7 - Free entitlement take-up of eligible 2-year-olds by ward

Note: Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending. Also, for the summer and autumn terms in 2020 the figures exclude Kirklees children that take their places in areas outside Kirklees.

#### Appendix 8 - Free entitlement take-up of 3-year-olds by ward

Source: Childcare Sufficiency Team – December 2021 Notes:

• Most 4 year olds move to school reception year in the autumn term, approximately 2% defer their place and remain in their early years provision, therefore no figures are shown for the autumn terms.

• Due to the pandemic the summer term 2020 figures are based on the number of children and hours funded at childcare providers rather than the number of children attending.

• For the summer and autumn terms in 2021 the figures exclude Kirklees children that take their places in areas outside Kirklees.
