Table KS001 Usual resident population
Table Population: All people

	Number and percentage intercensal population change (1)	Number and percentage of people living in households	Number and percentage of people living in communal establishments	Area (hectares) (2)	2001 Density (number of people per hectare)	Number of students away from home (3)
Number	-1	383,053	5,514	40,860	9.51	3,220
Percentage	-1.00	98.58	1.42	xxx	xxx	xxx

- Care must be taken when interpreting intercensal population change, as there have been changes in definition between 1991 and 2001, and the 2001 counts have been adjusted to account for under-enumeration.
- Area measurements are based on the 2001 version of the OS Boundary-Line data-set, amended where boundaries have changed since 2001, and do not include inland water.
- 'Number of students away from home' is the number of students and schoolchildren in full-time education who would reside in the area were they not living away from home in term-time. Data for the number of students away from home was not available from the 1991 Census.

- 'Age' is age at last birthday.
- 'Mean age' and 'Median age' are calculated using the underlying single year counts.

Table KS003 Living arrangements

Table Population: All people aged 16 and over in households

	All people aged 16 and over in households	People aged 16 and over in households						
		Living in a couple		Not living in a couple				
		Married or re-married	Cohabiting	Single (never married)	Married or re-married	Separated (but still legally married)	Divorced	Widowed

Percentage	100.00	52.17	9.82	21.51	0.99	1.96	5.99	7.57

1. The living arrangements variable is different to marital status as it combines information from both marital status and the relationship matrix. Therefore, a person living as part of a 'cohabiting couple' could in fact be married to someone else but will not appear as married or separated in this classification.
2. A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

1. Limiting long-term illness covers any long-term illness, health problem or disability which limits daily activities or work.

2. Working age population is 16 - 64 inclusive for men and 16 - 59 inclusive for women.

3. General health refers to health over the 12 months prior to Census day (29 April 2001).

4. Provision of unpaid care: looking after, giving help or support to family members, neighbours or others because of long-term physical or mental ill-health or disability or problems relating to old age.

Percentage	1.01	10.10	0.32	xxx	64.12	35.15

1. The distance travelled is a calculation of the length of the straight line between the postcode of place of residence and postcode of workplace.
2. Excludes working at home, no fixed place of work, working at offshore installations, working outside the UK.
3. For the purposes of this table, public transport is defined as 'underground, metro, light rail or tram, train, and bus, minibus or coach'.
4. The number of people who travel to work by public transport and live in a household with/without a car or van expressed as a percentage of the number of people who travel to work by public transport. These columns may not sum to 100% as residents of communal establishments who travel to work by public transport appear in neither column.
