Footnote:  
Cells in this table have been randomly adjusted to avoid the release of confidential data.

1. One year ago is one year before the Census (29 April 2001)
2. A wholly moving household is one where all members of the household have moved from the same address.  
A partly moving household include households where no household member had a usual address one year ago.  
but not all members have moved from the same address.
3. Inflow is not an exact count of all people moving into an area as it does not include people who had no usual address one year ago who did not live within the area.
4. Outflow is not a count of all people moving out of the area as it does not include people who have moved outside the UK.
5. In England and Wales 'associated area' refers to Local Authority District for tables at Ward (Electoral Division in Wales); Parish (Community in Wales) or Output Area level. For all other geographical areas the 'associated area' is England and Wales.

1. Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social grade.
2. In this table, Social Grade has been assigned on characteristics of the individual, rather than of the Household Reference Person as is standard.
