1. Social Grade is the socio-economic classification used by the Market Research and Marketing Industries; most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census; the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade. 2. In this table; people are classified by the Approximated Social Grade of their Household Reference Person.

*For the purposes of this table; a lone parent is defined as a parent with a dependent child living in a household with no other persons (whether related to that dependent child or not). This definition is to be distinguished from the standard definition of a lone parent used in other tables. A dependent child is a person in a household aged 0 - 15 (whether or not in a family) or a person aged 16-18 who is a full-time student in a family with parent(s).
