

Introduction

The purpose of this report is to explore findings from the 2011 *your place, your say* survey with particular relevance to the themes of the **ageing well programme**. Although age-based analysis will be key, this report also highlights other factors (for example income) to help provide a more rounded analysis. A general overview of key survey findings by age is available separately as part of a wider set of ‘communities of interest’ summaries.

Analysis is based on weighted data from the core random sample (n=8244).

What difference does age make to how people feel?

Older people (i.e. 65+) are generally quite positive in their perceptions of the local area and the council. They are the most satisfied age group across a range of measures:

Your place, your say survey measure	Kirklees (%)	18-34 (%)	35-64 (%)	65+	
				%	Comp with Kirklees
% satisfied with local area as a place to live	76%	72%	75%	82%	+6%
% satisfied with the way Kirklees Council runs things	39%	38%	38%	45%	+6%
% agreeing that Kirklees Council provides value for money	33%	32%	32%	38%	+5%
% agreeing they feel well informed about local public services overall	49%	39%	50%	60%	+11%

As well as being more satisfied than the Kirklees average, the results for residents aged 65+ are significantly higher than for other age groups - including the next cohort of ‘ageing’ residents (i.e. 35-65 year olds). With the exception of Children’s Centres, those aged 65+ were also the most satisfied age group with each of the different council services listed on the questionnaire.

However, it is worth noting that a slightly different trend is apparent in terms of perceptions of how local public services treat people:

To what extent do you agree or disagree that local public services...	Kirklees (%)	18-34 (%)	35-64 (%)	65+	
				%	Comp with Kirklees
...involve residents when making decisions	22%	23%	20%	25%	+3%
...treat people with fairness and respect	45%	49%	43%	48%	+3%
...treat people equally regardless of their background (e.g. age, disability, ethnicity)	49%	55%	46%	48%	-1%
...can be trusted to work in the best interest of local people	34%	39%	30%	35%	+1%

Here, it is younger residents (18-34) rather than those aged 65+ that tend to be the most positive. Furthermore, rather than it being a simple reverse trend it is 35-64 year olds (the next cohort of ‘ageing’ residents) that have the lowest levels of agreement with these statements.

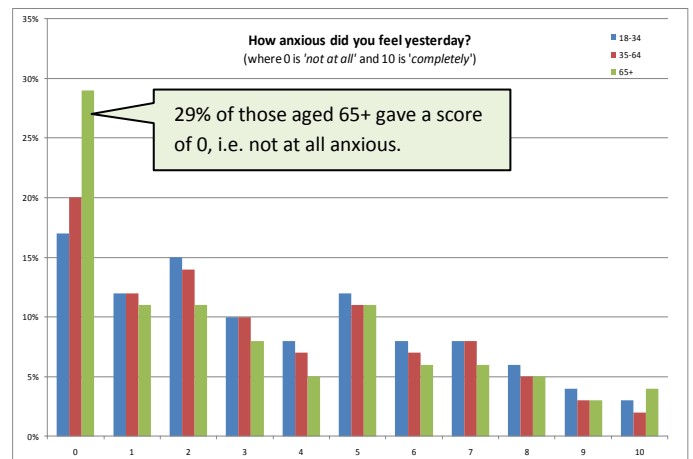

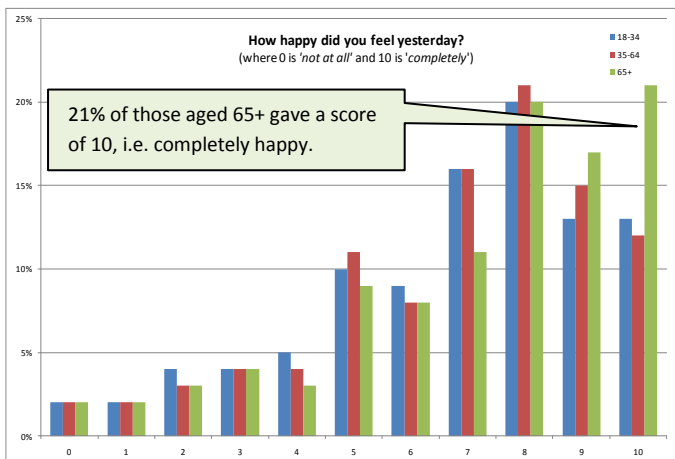

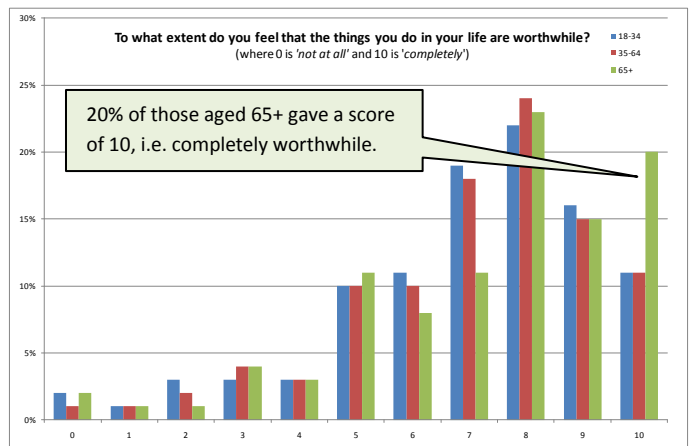

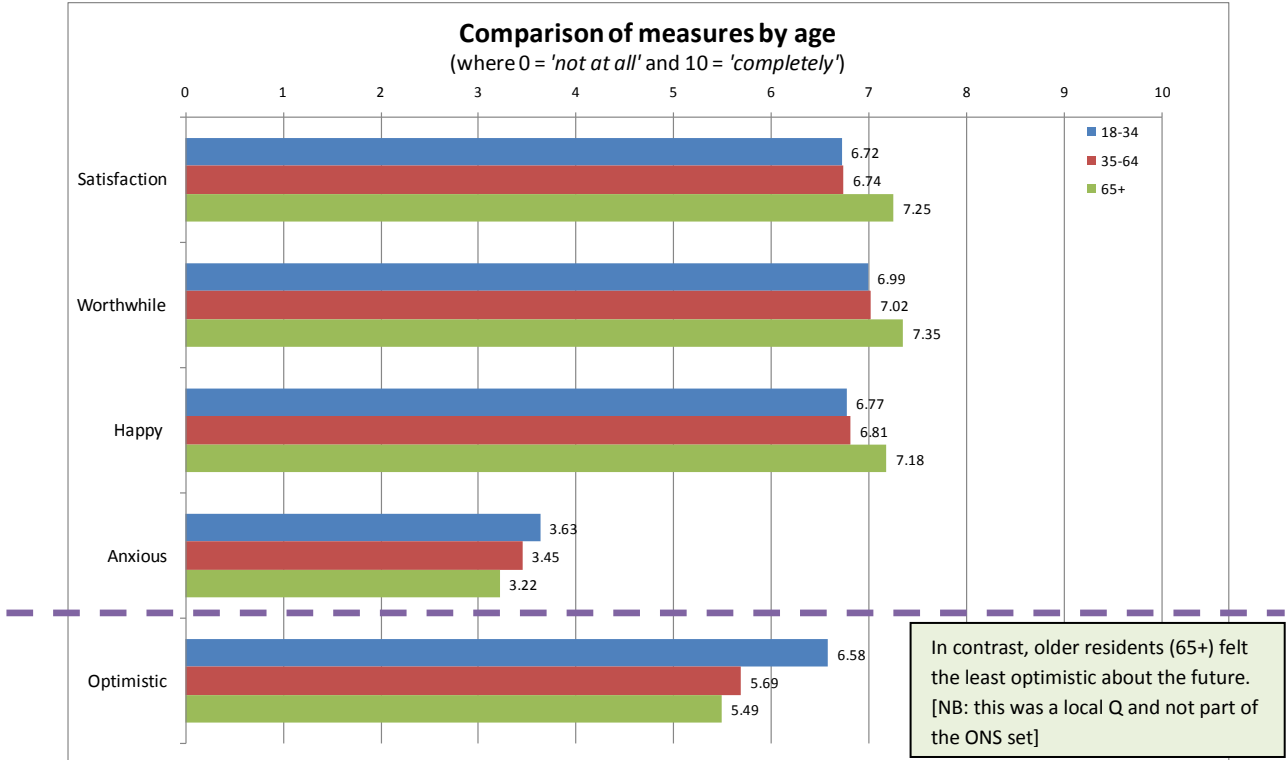

Age also has an impact on people’s overall priorities and what’s important to them. Whilst ‘a safe local environment’ is the most important factor in making somewhere a good place to live across all age groups, there are some differences in other areas according to life stage (see Appendix 1). For example, good public transport links are significantly more important to those aged 65+.

A full set of data tables showing all survey responses split by age (with significant differences between groups highlighted) are available via the Kirklees Intelligence Observatory. Please see also the separate ‘AGE’ overview that forms of part of our wider set of communities of interest summaries.

Wellbeing and optimism

As with measures of satisfaction with the local area, council and services, older people (65+) score higher in terms of four measures of subjective wellbeing:

- ...how **satisfied** are you with your life nowadays?
- ...to what extent do you feel the things you do in your life are **worthwhile**?
- ...how **happy** did you feel yesterday?
- ...how **anxious** did you feel yesterday?

Similarly, feeling that the things you do in life are worthwhile, happiness and optimism for the future all increase as the level of household income increases (and since the bulk of survey respondents aged 65+ had an annual household income of less than £20,000, this suggests that age is independent of income in terms of having a positive impact on overall life satisfaction).

Some characteristics of the survey sample

Further exploration of some of the characteristics of the different age groups of respondents within the sample can help contribute to our understanding of these groups and their views:

18-34	35-64	65+	
29% (n=647)	16% (n=561)	39% (n=435)	...have an annual household income of less than £10,000
7% (n=166)	13% (n=518)	40% (n=468)	...have no qualifications
24% (n=5316)	22% (n=846)	49% (n=683)	...have just one person in their household
13% (n=304)	29% (n=1138)	28% (n=353)	...say they look after or give support to family members, friends, neighbours or others
13% (n=289)	24% (n=948)	58% (n=872)	...are limited in their day-to-day activities due to a health problem/disability lasting more than 12 months
41% (n=933)	45% (n=1713)	44% (n=553)	...have given unpaid help to a local group/club/org in the last 12 months (<i>i.e. volunteered</i>)
Goals for the future			
77% (n=1123)	76% (n=1488)	62% (n=158)	...say it is important to them to make a healthy change
68% (n=1115)	60% (n=1305)	42% (n=126)	...say it is important to them to learn new skills and hobbies
39% (n=567)	36% (n=666)	36% (n=94)	...say it is important to them to get involved to help provide local public services and improve the area
52% (n=822)	51% (n=1101)	58% (n=208)	...say it is important to them to help out a local group/club/org (unpaid) to make a difference

APPENDIX 1: Q1 (priorities) by age (significant differences between age groups highlighted)

Q1a Thinking generally, which of the things listed below would you say are most important in making somewhere a good place to live?

Base: 8013			Total		Q28. Age								
					Net - 18-34			Net - 35-64			Net - 65+		
			A1		K1			L1			M1
