

# Kirklees Publicly Accessible Trauma (PACT)

## First Aid Kits

**What are trauma first aid kits?** A trauma kit is designed to treat major injuries or control bleeding until professional medical attention can be received. They are also known as Publicly Accessible Trauma PACT First Aid Kits.

**How do I know there is a PACT first aid kit on site:** Where we have been notified of a PACT first aid kit being present, the below stickers have been offered for public window display to indicate that a kit is available on site.

**What is contained inside the PACT first aid kits?** They include, but are not limited to; disposable gloves, disposable glasses, disposable face masks, trauma wound dressings, bandages, tourniquet, and face shields. A summary guidance video on using some of the equipment in these kits (including tourniquets, bandages and dressings) can be found [here](#).
