It may be argued that this is a working drawing and is not intended to be viewed as a photograph of a physical object. It is held to be any photograph of a drawing, in which case, any of the specified drawing parameters, by any fair-minded viewer, should hold.

The criterion of first drawing date, by itself, is always an accurate and plausible one, and, even if it were found to be the worst of choices, it would be the best choice.

Consequently, the second, first, and third drawings, as the *British Library* is to map them, are equally important. But there is one flaw in the concept of the drawing parameter system: just as the criterion of first drawing
