

7. Summary and Conclusions

From examination of national, regional and local transport policy, it is considered that the development not only complies with all objective policy criteria, but also that it complements the objectives and strategies of the Kirklees Unitary Development Plan and West Yorkshire Local Transport Plan.

The strategic location of the site offers excellent sustainable transport opportunities. The site is located close to a major bus route, Huddersfield Town Centre and a Transport Interchange.

The site offers excellent linkage opportunities with local Milnsbridge Town Centre opportunities.

The redevelopment is projected to reduce the total traffic flows along the highway network, as well as during the morning and evening peak periods.

The redevelopment shall remove undesirable heavy goods vehicle movements providing significant benefit to highway safety and its operational efficiency.

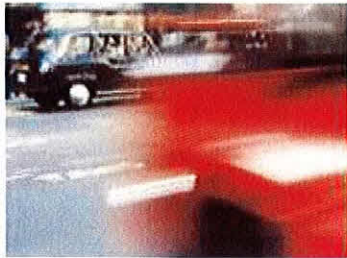

The proposed site layout reflects current highway design guidance and improves the existing site access arrangements in terms of pedestrian and vehicular access.

The level of on site car parking is in accordance with current government policies and the Kirklees Unitary Development Plan.

Personal injury accident investigations have revealed no common trends or accident clusters.

Taking all matters into account it is considered that the proposed development constitutes sustainable development within a Town Centre location.

APPENDIX A – PUBLIC TRANSPORT

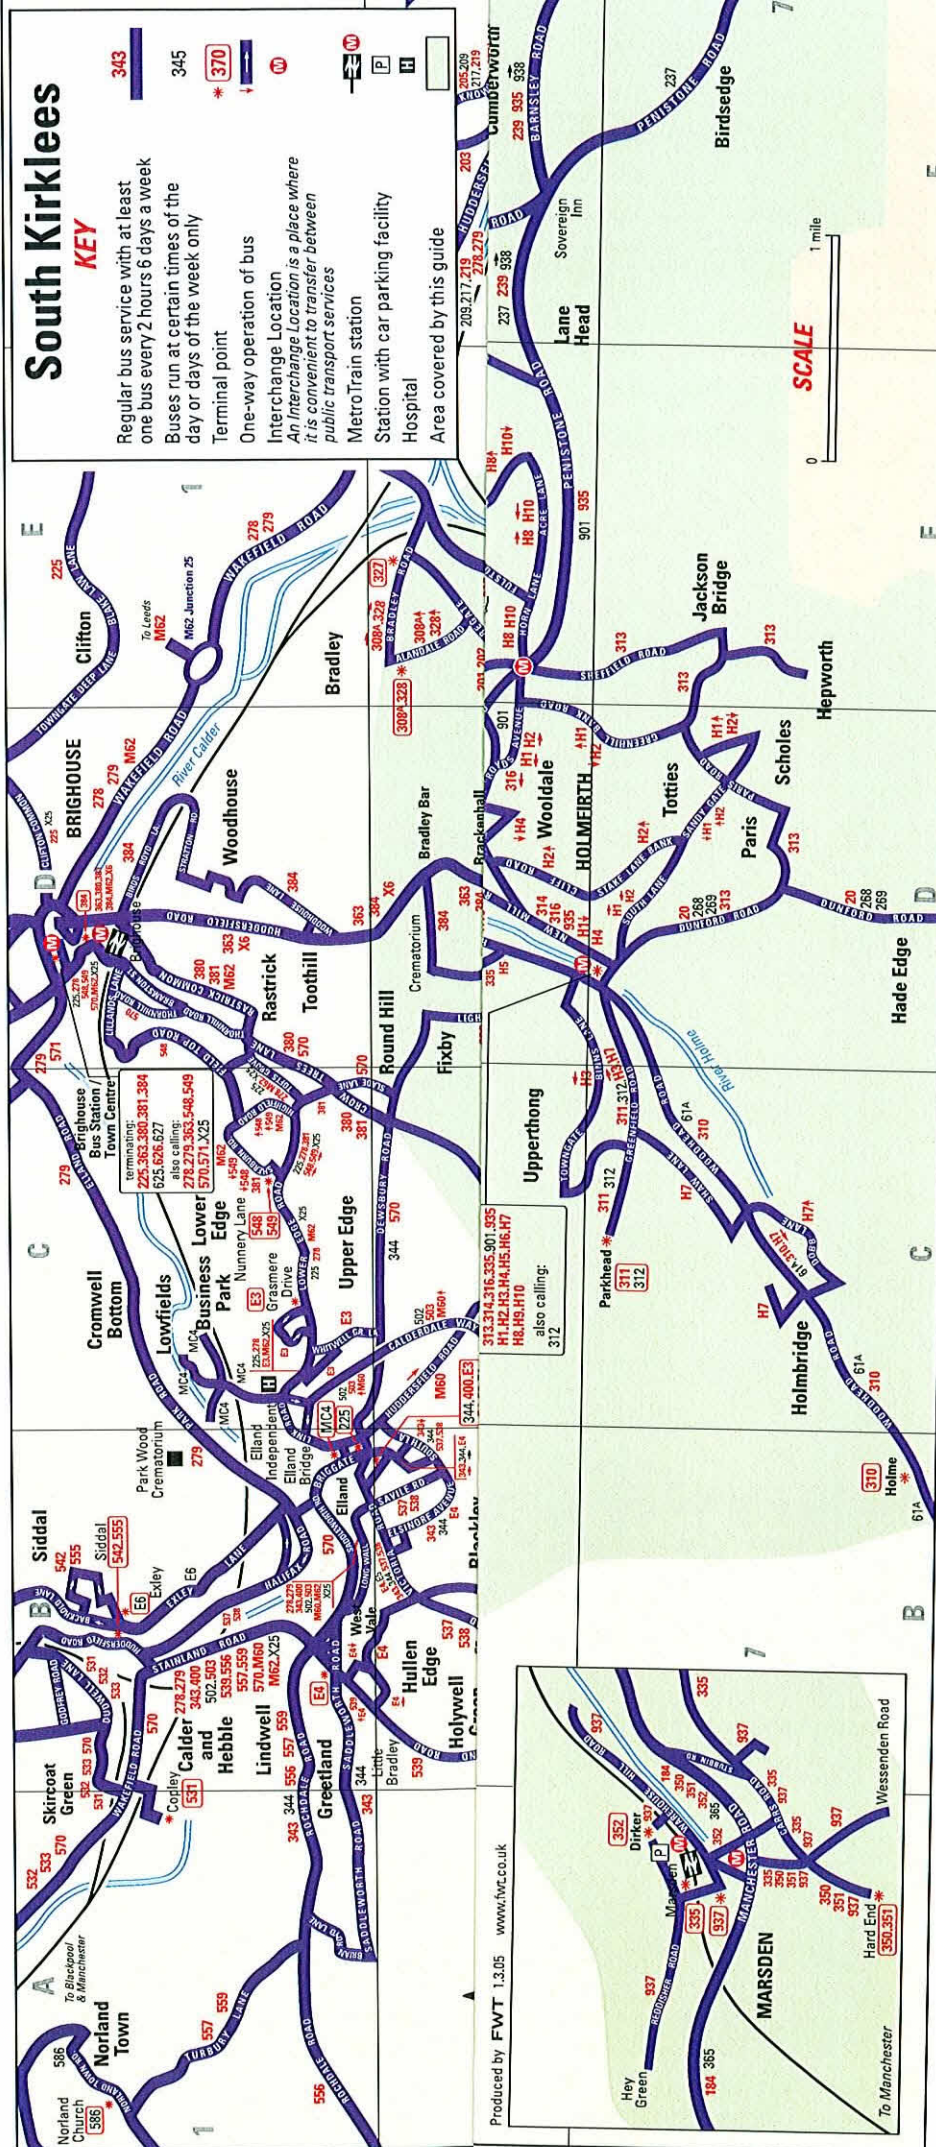

Appendix A – Public Transport

South Kirklees

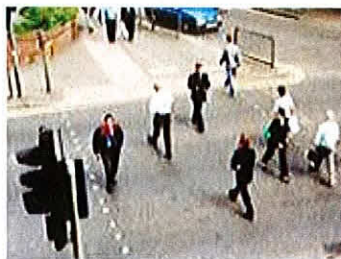

KEY

- Regular bus service with at least one bus every 2 hours 6 days a week
- Buses run at certain times of the day or days of the week only
- Terminal point
- One-way operation of bus
- Interchange Location
- An interchange location is a place where it is convenient to transfer between public transport services
- MetroTrain station
- Station with car parking facility
- Hospital
- Area covered by this guide
