15c Allison Drive
Huddersfield
HD2 2RA

Tree report

I have been to assess the Ash tree that resides at no 15c, Allison drive and leans precariously over the A641 Bradford Road.

Upon inspection I noticed that quite a few large branches had fallen.
This is a result of Bracket Fungi deterioration which will have resulted in serious structural weakness within the trees heartwood. In my opinion this tree is Dangerous and should be removed due to it being next to main road.

Tree ID: 06/85/t5
