Dear Sir

The December gales have completely split and blown over a Rowan tree in the lower churchyard at Holy Trinity Church, South Crosland. I attach a photograph to illustrate its present condition.

It is subject to Tree Preservation Order number 18 (1985) and in our 2012 Arboricultural Safety Survey (also attached), it is identified as T58. We plan to remove the tree when the weather allows but because of the TPO, I thought I had better bring this to your attention. Do I need to take any further action with you?

Also since 2012, we have systematically removed or pruned dangerous trees for which, you have granted three consents. These are 2013/90107, 2013/92094 and a third one where I have lost track of the number; it was granted in March 2014 and I would be grateful if you could advise me of the number for my record.

Thank you

John Kent

South Crosland PCC
