Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

T1, Birch - Remove the small dying Birch tree to ground level and grind out the stump.

The tree is a poor specimen and is in decline.

T2, Birch -Cut back the larger Birch tree touching the property by approx. 2 metres from the branch tips and remove any crossing branches.

The tree is growing very close to the property and has various crossing limbs that need removing to prevent any future weak points.

T3, Hawthorn -Crown lift the Hawthorn tree over the wall to a height of approx 3 metres.

Crown lift to stop any damage to the wall.

T4, Oak - Crown lift the Oak tree over the path to approx 4 metres.

Crown lift for public access to path.

T5, Willow -Crown thin the canopy by approx 15%.

Try achieve maximum light into the garden and reduce the sail weight.
