Hi Beatrice,

I have reviewed the further information supplied by Paul McGuire and can agree with the plans. Please can you ensure the added information is on the website and a condition will need to be attached that they need to implement the lighting scheme as per all the plans provided.

Regards

Good Morning Andrew,
Please see the email below from the lighting designer which I hope will satisfy your reservations regarding the proposed lighting at the above. I trust that you can now recommend planning permission on these lines.

Regards,

Paul McGuire MCIAT.

Hi Paul

The new LED fittings that will be used on the project are using a narrow beam angle and the fittings are adjustable to make sure the light spread is very equal,

After the installation the fittings will be adjusted to make sure that there is no overspill of light to affect the surrounding areas. The LED fittings are the only fittings on the market that are suitable to light up the area from one side of the pitch.

Please see attached photometrics, Hope this is OK

Best Regards

Paul

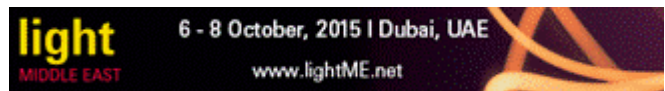

This is where the light needs point, hope this makes sense
