Date (DD/MM/YYYY): (Must be pre-application submission)

Details of the pre-application advice received:

The original approved layout was of a courtyard type development. It is envisaged that the reserved matters details would result in a high quality development using natural materials to match the surrounding development.

There are some concerns with the proposals you have submitted but some positive elements.

The layout of the development would result in the creation of 2 accesses off Briestfield Road this has an impact both on visual amenity and highway safety. The relationship of the larger house to the rear of the site could appear slightly odd, I'm assuming that this is partly to maximise the view and garage space of this dwelling.

The benefit of this layout is that the parking would be hidden from the street scene, something, in my view is important in the Green belt and this village location. I can't see an elevation detail for the street scene; I would prefer for this elevation to appear fairly traditional with limited openings.

One thing I was concerned about with the development of this site is the scale of the dwellings; in particular the height. It looks as though the proposed dwellings may be quite high, this would have an adverse impact on the openness of the Green Belt.

The dwellings have a fairly contemporary look but if this is generally within the courtyard setting I don't really see a problem with this.

Whilst the use of a mix of contemporary and traditional features do work I'm not convinced by the dove cote/ weather vane feature, I don't see where this fits in?

The proposed layout provides outdoor amenity space for the main dwelling but there is very little for the other three dwellings. There is also no enclosed storage areas, it is important to provide these features otherwise we will receive further applications which may compromise the design of the development.

A further point is that the original scheme drew the built development way from the open fields to the rear, please be sure that this proposal doesn't encroach any further.

Overall I think the scheme, if it comprises larger properties, would fit the site better and not have an adverse impact on the openness of the Green belt if the number of dwellings were reduced to 3. This would allow reasonable amenity space but still retain an element of the courtyard. It would also draw the development away from the open fields to the rear.
