## Orange Design Studio.

*“Orange Design Studio is a young and vibrant architectural design practice”*

Our Mirfield based studio focuses on providing buildings & spaces of a high quality. With an opinion that all work should be both well designed and detailed.

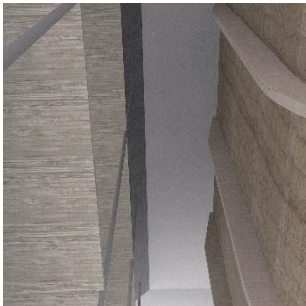

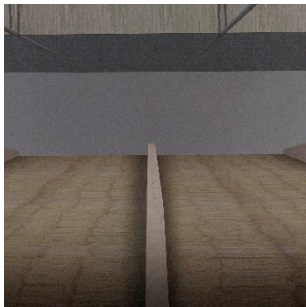

We believe in designing from the inside out, providing an internal programme for a building that is suited to our client's every need; the process that provides the next step in the design of the building.

At Orange Design Studio, we have experience with many successful projects and are not limited to a certain sector, assessing each enquiry on a project by project basis. This allows us to assess and decide upon our abilities of which we can bring to the project.

Successfully completing a number of projects within the residential, commercial, leisure and industrial sectors; we have also worked on several high profile restoration and conservation projects where a number of the historic buildings are on the English Heritage 'At Risk' or 'Listed' register.

The ability to gain knowledge and experience from each project worked on, allows for the development of in-house, collective research into the rejuvenation & reuse of buildings, and to the progression of new build design.

## Materiality.

The combination of sharp red brick and vertical western red cedar timber cladding, provides a clean pallet of materials into an area with no set vernacular style. The combination is aesthetically pleasing yet cost effective.
