Proposed pump  
min. 10.0m x 8.0m  
made up of 1.8m  
Min. stand-off fr  
of 15.0m.

The location of bird and bat boxes within the woodlands are indicative and specific trees will be chosen closer to the time of installation.

However, the following criteria should be met when installing bat and bird boxes.

Bat boxes should be mounted at a height of 3m+ in positions sheltered from the wind and exposed to the sun for at least part of the day.

Bird boxes should be situated at east or west orientation to avoid direct exposure to the sun for the majority of the day.  
Swift boxes should be grouped and installed at a height of 5m+.
