

Re planning reference 2018/91661

I am formerly writing this email today to object again the new application for development of the disused Heckmondwike railway line.

The traffic around these roads involved are nothing short of gridlocked at school times

For example The recent development of the chapel on church street has caused multiple near misses due to works vehicles parked on both sides in the limited non permit spaces. Plus delivery of materials etc blocking the footpaths and access.

My objection

This development will cause devastation to the environment including loss of much needed green space + increased air pollution.

Also severe increase in noise and congestion. From both the equipment and resulting housing development that will come if this access road application is passed.

Heckmondwike road is already unable to operate at peak time with tailbacks almost to Dewsbury moor most days.
