

Dear sir/madam,

I want to object to the proposal. Not only is traffic a problem already without adding additional cars to add to the congestion never mind the noise and air pollution. The loss of the green space is another aspect I am concerned about, there are only a few places near by where there is a bit of nature so we should maintain it instead of getting rid of it!!

I hope you think about the families that live here and the impact this planning will effect our children and the future of living here.
