Subject: Heckmondwike Railway Cutting Planning reference 2018/91661

I am writing to object to the planned development at Heckmondwike Railway Cutting, I live on St James Street and have enjoyed the relative peace and quiet of this part of Heckmondwike for the last seven years so I was extremely upset to read about the proposed development to the cutting which is such a lovely part of Heckmondwike.

- The noise will be unbearable
- It will cause pollution
- Yet more loss of green space
- The traffic congestion now is bad so to heavy lorries and more cars to what is already a problem will make this area unpleasant to say the least.
- Also there are bats roosting under the bridge on Church Street and this will no doubt disturb them, not to mention the foxes and other wildlife.
- The noise and dust from Land Engineering will be a nightmare
- Parking , which is a real problem especially around the school run , will be an issue
- And finally why cant we just leave our green space alone? why does it seem that every bit of land with a bit of grass on has to be built on? Local people don,t want this , it,s been turned down before and hopefully it,ll be turned down again
