

I would like to make my objection to the planning application to build houses on the railway cutting. first of all there would be a huge increase in the volume of traffic in an already very congested area traffic regularly backs up from heckmondwike way back on walkley lane.Schools are already at bursting point doctors and dentists already take an age to get an appointment.We would also lose our green space which we have very little of. So i would very much hope it is rejected on these grounds.
