

Re planning application 2018/91661

Having studied the above application I wish to register my objection to the proposed plan. At present trying to get out of Church Street onto Walkley Lane is a nightmare at busy times, and nigh on impossible at School start and end times, cars park all along our road - Grove Road - Church Street, Horton Street and connecting roads leading down to Walkley Lane.

The traffic flow through Heckmondwike is already very slow and is fast becoming a bottleneck, where we live the air quality has deteriorated with queuing traffic most of the day, I am concerned that the children at Cawley Lane are breathing polluted air, more houses in such a built up area will only add to this.

During any building and excavation I can see that heavy lorries would be an extra nuisance.

I ask that my concerns and views are considered when deciding on this application.
