Planning Reference 2018/91661

To whom it may concern,

Regarding the proposed plans to develop and build on the disused railway embankment in Heckmondwike. Traffic congestion is already a problem on these roads, children will also be put in danger trying to get to school and back. There are too many students in local schools already and issues with accessing doctors, dentists etc - further housing will make this even worse. How about finding some land in Huddersfield for the extra housing?
