

I am writing to object to the planned development at Heckmondwike Railway Cutting,

- The noise will be unbearable
- It will cause pollution
- More green space will be lost
 - The traffic congestion is already bad so heavy lorries and more cars will add significantly to this problem
- I believe there are bats roosting in this area under the bridge on Church Street and this will no doubt disturb them, not to mention the foxes and other wildlife.
- Parking , which is a real problem especially around the school run , will be an issue
- Loss of local natural areas. This is being significantly depleted recently.

Thank you.
