

**Subject:** 2018/62/91661/E planning application

Hello,

I am a resident of Sunnyside, Heckmondwike. My home overlooks the site for the planned proposal 2018/62/91661/E. I would like to register my opposition to this plan.

There will be a marked increase in traffic if the plan goes ahead which will increase congestion and pollution in an already busy area. It is already difficult to find parking and even leave the town for work, given how busy the roads become during the school periods, on a morning and afternoon. The local roads cannot deal with the congestion as it exists currently and this problem will obviously only become worse. The conjection will become unbearable and nobody will want to live in heckmondwike in the first place if they can't even make it out on a morning- Sort out the already existing conjection issues before you decide to add to the problem!

I, along with many others, also walk my dogs along this route on a morning; it is already difficult to find areas to do this and the planned building will reduce this area further. Having access to green areas is an important aspect in the lives of me and many others in the area. More building in an already built up area is completely uncalled for. There is an abundance of wildlife- birds and foxes that live in this area and any building will destroy these habitats. Many children also get great enjoyment from being able to play and roam around the very little space that exists currently. This should not be taken away.
