

Dear Sirs

I am writing to object about the above application. I live on Horton Street in Heckmondwike and have listed the following reasons why I object:

1. The level of traffic and congestion is already extremely high in Heckmondwike and the infrastructure cannot support anymore. Even in non peak hours the traffic is bad and this can be extremely frustrating.
2. I have a young baby and will not want to deal with extreme noise and disruption from the site.
3. The level of pollution also concerns me, especially as my young baby
4. There is just not enough space for anymore houses in that area and the local infrastructure cannot support that, whether its doctors, schools, parking or green space loss.

The previous application was rejected and this one is just not viable. The space should be opened up as a greenway for the local community to use and enjoy for future generations.

Thanks
