Subject: Re: Public meeting date announced, a week on Friday 3pm Subject: Planning Application 2018/91661
Proposed residential development - outline application for up to 74 dwellings with means of access to, but not within, the site Land at Walkley Terrace and ...

Dear

I refer to the above application. I understand that the Planning Committee has deferred the planning application 2018/91661 until further public consultation has taken place between the developer and the local residents.

Why would anyone schedule a meeting through the working day when it has been designed for the sole purpose of speaking to the local people?! Furthermore I understand that the developer will not be attending but substituting a paid representative to act on his behalf. I find this whole affair a disgrace, firstly the council for considering this money making affair and secondly that a developer who is only interested in his personal gain would give any form of support to the local community!

Please please consider the bigger picture, the roads around Horton street, Brunswick street, church lane, Thomas street are substandard and chocked with permitted cars parked outside their own houses making the streets mention a virtual one way system. It's a nightmare negotiating along with the two church traffic, Heckmondwike Grammar school and double parked cars. I live here I have to travel daily, the highways department have seriously underestimated the situation which is very worrying to say the least!!

I would sincerely appreciate your consideration. These decisions shouldn't be taken lightly, there's a much bigger picture here and that's this area is inadequate and cannot substantiate this level of development with such a poor infrastructure.

Yours sincerely
